

POWER PARTNERS AT A GLANCE

Integrated Power & Engineering Solutions Across Asia

Power Partners Group supports mission-critical infrastructure with reliable, efficient and scalable solutions across four core pillars — Power Protection, Green Energy, Modular Infrastructure and Engineering.

As part of Japan’s Air Water Group, we combine regional experience with technical expertise to deliver end-to-end support — from system planning and integration to project management, testing & commissioning and after-sales support.

Core Capabilities

- Integrated Power Solutions
- Project Management
- Testing & Commissioning
- After-Sales Support

**POWERING
MISSION-CRITICAL
INFRASTRUCTURE**

Integrated power solutions with project delivery and lifecycle support.

INTEGRATED POWER SOLUTIONS

Four solution pillars for mission-critical infrastructure.

POWER PROTECTION

Reliable power generation, protection, transfer and monitoring solutions designed to sustain critical operations and system uptime.

Key Solutions

- Dynamic Rotary UPS (DRUPS)
- Generator Systems
- UPS & Static Transfer Switches (STS)
- Power Monitoring
- Power Distribution Units (PDUs)
- Load Banks
- Exhaust Systems
- Fuel Storage & Transfer Systems

GREEN ENERGY

Lower-carbon and energy-efficient solutions for more resilient and sustainable infrastructure.

Key Solutions

- Gas Generator & Gas Turbine Systems
- Cogeneration / Combined Heat & Power (CHP)
- Battery Energy Storage Systems (BESS)
- Solar Integration
- Advanced Cooling (Air / Liquid / Immersion)

ENGINEERING

Engineering expertise that integrates equipment and technologies into complete, project-ready systems.

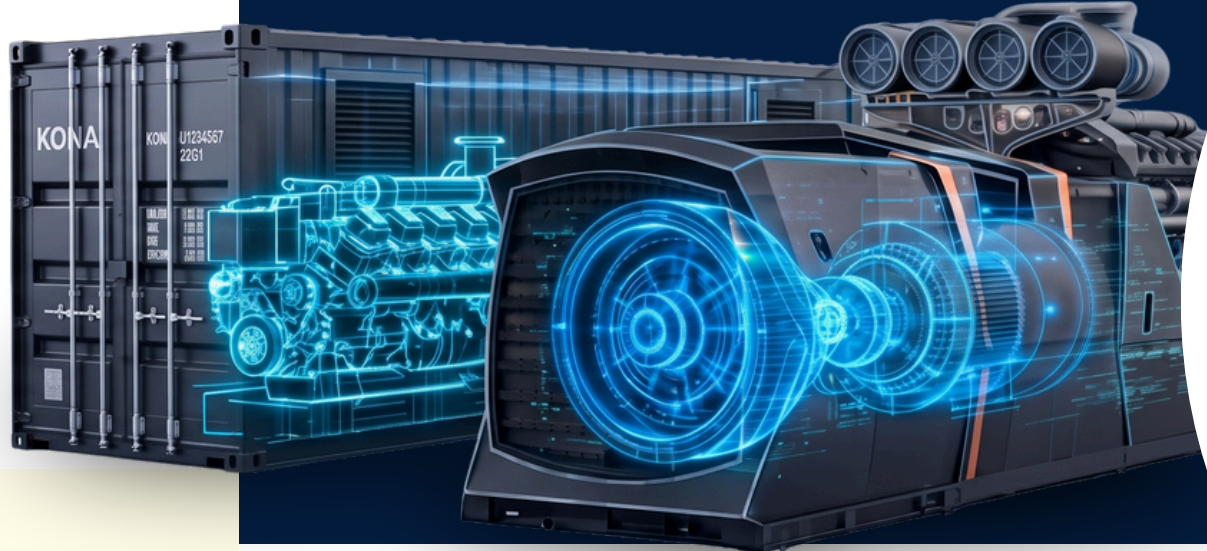

Key Solutions

- System Studies & Technical Design
- Load Flow & Discrimination Studies
- CFD / Thermal Analysis
- Structural & Acoustic Analysis
- System Integration
- Hoisting & Positioning Planning
- Installation & Site Support

20+ YEARS
DELIVERY
EXPERIENCE

900+ MVA*
POWER
CAPACITY
DELIVERED

ISO CERTIFIED
9001 • 14001
• 45001

MODULAR INFRASTRUCTURE

Prefabricated and modular power infrastructure engineered for controlled integration, efficient deployment and reduced on-site complexity.

Key Solutions

- Power Train Units (PTUs)
- Prefabricated Power Systems
- Skid-Based Systems
- Factory Integration & Testing

LIFECYCLE SERVICES

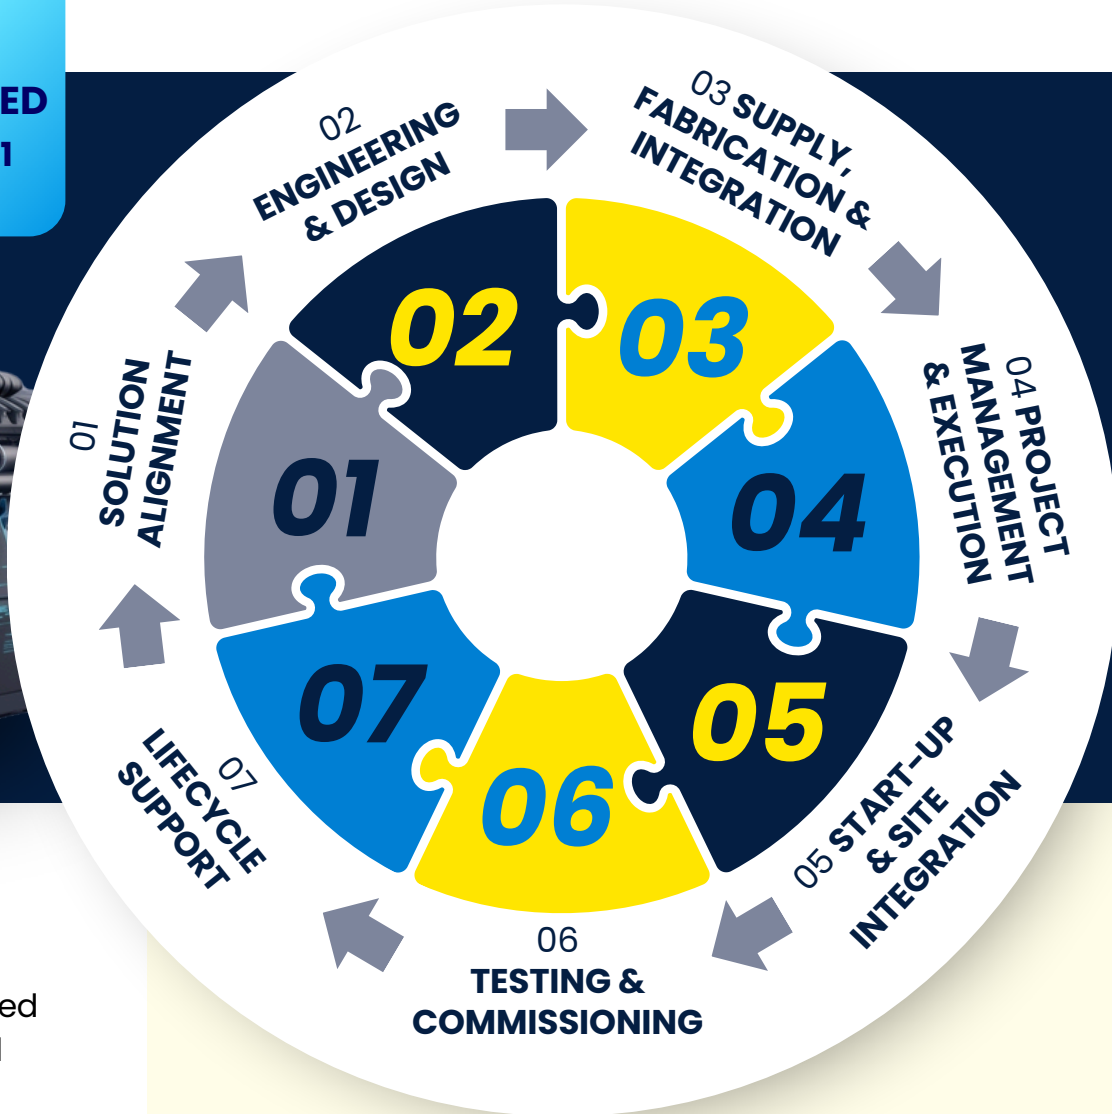

Built for uptime with maintenance, testing, repair and long-term lifecycle support.

- Preventive Maintenance
 - Overhaul & Repair
 - Testing & Commissioning
 - Troubleshooting & Technical Support
- Rental Services
 - Spare Parts Support
 - Workshop & Field Services

Note: *Across DRUPS and generator projects.

FROM CONCEPT TO UPTIME

A 7-Step End-to-End Delivery Journey

WHY CHOOSE US

Complex projects, one coordinated team.

END-TO-END DELIVERY

From solution development to lifecycle support.

BUILT FOR UPTIME

Engineering, commissioning and support for long-term reliability.

REGIONAL REACH. LOCAL SUPPORT.

Proven project experience across Asia and multiple mission-critical sectors.
